Methodology: The library and information studies program rankings are based solely on the results of a peer assessment survey. Respondents were asked to rate the academic quality of programs on a scale of 1 (marginal) to 5 (outstanding). Scores for each school were totaled and divided by the number of respondents who rated that school. The response rate was 51 percent. Surveys were conducted by Synovate in the fall of 2005.

Note: Lists of schools consist of those master's programs accredited by the American Library Association. The survey was sent to the dean of the program, the program director, and a senior faculty member in each of these programs.
